Overview of First Things First

On November 7, 2006, Arizonans made an historic decision on behalf of our state's youngest citizens. By majority vote, they made a commitment to all Arizona children 5 and younger, that children would have the tools they need to arrive at school healthy and ready to succeed. The voters backed that promise with an 80-cent per pack increase on tobacco products to provide dedicated and sustainable funding for early childhood services for our youngest children. The initiative created the statewide First Things First board and the 31 regional partnership councils that share the responsibility of ensuring that these early childhood funds are spent on strategies that will result in improved education and health outcomes for kids 5 and younger.

First Things First is designed to meet the diverse needs of Arizona communities. The regional councils are comprised of community volunteers, with each member representing a specific segment of the community that has a role in ensuring that Arizona's children grow up to be ready for school, set for life: parents, leaders of faith communities, tribal representatives, educators, health professionals, business leaders, and philanthropists.

First Things First Strategic Direction

FTF's commitment to young children means more than simply funding programs and services. It means having a shared vision about what being prepared for kindergarten actually means. First Things First specifies that programs and services funded by the FTF Board and Regional Partnership Councils are to address one or more of the following Goal Areas as defined by the statute:

- Improve the quality of early childhood development and health programs.
- Increase the access to quality early childhood development and health programs.
- Increase access to preventive health care and health screenings for children through age five.
- Offer parent and family support and education concerning early childhood development and literacy.
- Provide professional development and training for early childhood development and health providers.
- Increase coordination of early childhood development and health programs and provide public information about the importance of early childhood development and health.

The FTF Board established a strategic framework with a set of school readiness indicators that provide a comprehensive composite measure to show whether young children are ready for success as they prepare to enter kindergarten. The strategies funded by FTF work collectively to develop a comprehensive system across the state and regionally to address the school readiness indicators. The FTF Board and Regional Partnership Councils determine the priorities and strategies to be funded across the state and throughout the regions assessing the challenges and building on the resources and assets in place.

School Readiness Indicators

1. #/% children demonstrating school readiness at kindergarten entry in the development domains of social-emotional, language and literacy, cognitive, and motor and physical
2. #/% of children enrolled in an early care and education program with a Quality First rating of 3-5 stars
3. #/% of children with special needs enrolled in an inclusive early care and education program with a Quality First rating of 3-5 stars
4. #/% of families that spend no more than 10% of the regional median family income on quality care and education with a Quality First rating of 3-5 stars
5. % of children with newly identified developmental delays during the kindergarten year
6. # of children entering kindergarten exiting preschool special education to regular education
7. #/% of children ages 2-5 at a healthy weight (Body Mass Index-BMI)
8. #/% of children receiving timely well child visits
9. #/% of children age 5 with untreated tooth decay
10. % of families who report they are competent and confident about their ability to support their child's safety, health and well being

What is the Funding Source?

First Things First provides for distribution of funding through both statewide and regional grants. Statewide programs are considered those implemented across regional boundaries and are designed to benefit Arizona's children as a whole. Regional funding is based on the approval of the Regional Partnership Council funding plans submitted to the FTF Board each year.

This Request for Grant Application (RFGA) is specifically dedicated to funding regional programs. The Regional Partnership Council that is involved in the release of this RFGA is the San Carlos Regional Partnership Council.

Who is Eligible to Apply for this Funding Opportunity?

First Things First awards grants to:

- Non-profit 501 (c) (3) organizations providing services in Arizona (both secular and faith-based)
- Units of Arizona government (local, county and state entities as well as schools and school districts)
- Federally recognized Tribal governments or entities providing services within Arizona
- Arizona institutions of higher learning (colleges and universities)
- Private organizations providing services in Arizona

All potential Applicants must demonstrate organizational, fiscal and programmatic capacity to meet the requirements described in the scope of work listed in this RFGA.

What is the Total Funding Amount Available in this Request for Grant Application?

This is a nine (9) month contract for the fiscal year ending June 30, 2013 with an option for renewal for two (2) additional twelve (12) month periods. Total funds available are approximately \$112,500 for the first funding period. First Things First reserves the right not to award the entire amount of available funds or to award an amount that is greater than the posted available funds. Renewal will be contingent upon satisfactory contract performance, evaluation and availability of funds. One or multiple awards may be made.

Scope of Work: What Will This Grant Fund and How Will It Make a Difference for Children?

FTF is seeking successful applicants to implement this strategy and work collectively with FTF to impact the school readiness indicators below:

- #/% of children ages 2-5 at a healthy weight (Body Mass Index-BMI)
- % of families who report they are competent and confident about their ability to support their child's safety, health and well-being

First Things First Goal Area to be addressed:

Health

Statement of Need

The San Carlos Apache Regional Partnership Council is aware of the increase in childhood obesity in the community and has observed a lack of nutrition and physical activity programs for the children in the region. This need was further supported by information obtained through Apache Healthy Foods Survey that suggests that above 60 percent of Apache families, including children, are pre-diabetic. The Regional Council wants to address the need for primary interventions targeting nutrition, healthy weight and physical exercise into existing community services for children ages birth through five. The Regional Council would like to see health education and awareness messages to be integrated into the proposed program and the community in an ongoing and regular basis.

The Regional Needs and Assets report shows that in 2009 the San Carlos Unified School District's Rice Elementary School Arizona's Instrument to Measure Standards Dual Purpose Assessment Score Achievement Levels in Reading were at 27% falls far below, 46% Approaches and 28% Meets expectations. The Needs and Assets Report also shows that 32.7% of all live births reported for the San Carlos Apache in 2009 were born to mothers that had not achieved a high school diploma that further supported the intention of the Regional Council to include early literacy as a component of this strategy. It is also the intention of the Regional Council to

incorporate early literacy materials specific to nutritional needs for young children into the training for families of the children served through this strategy. The existing literature for obesity prevention for children ages 0-5 should be used in parent training both for content and as an early literacy experience. The strength of a proposal includes the integration of this nutritional literature into program implementation and planned activities that encourage routine physical exercise.

This strategy will move the early childhood system in the San Carlos Apache Indian Reservation by building upon the existing coordination efforts among early childhood professionals and by looking at ways in which funding sources can be maximized.

Background information: The Centers for Disease Control and Prevention (CDC) refers to the number of overweight/obese adults and youth as reaching “epidemic” proportions in this country. In the United States, the prevalence of childhood overweight tripled between 1980 and 2000. Nationally, there has been a four-fold increase in the number of children six through eleven year-olds who are overweight over the last 40 years. Arizona has the second highest rate of childhood obesity in the Nation with more than one-third of all children in Arizona being obese.

According to the 2003 National Survey of Children’s Health, 30 percent of children age 10 through 17 were overweight or at-risk for becoming overweight in Arizona. In Arizona during 2005, 36 percent of children ages two to five receiving Arizona Women, Infants, and Children (WIC) services had a Body Mass Index (BMI) at or above the 85th percentile (i.e. overweight or at-risk for becoming overweight). The prevalence of overweight varies by weight and ethnicity. In 1999-2002, 14 percent of non-Hispanic White adolescents, 21 percent of non-Hispanic African American adolescents, and 23 percent of Mexican-origin adolescents were overweight.

Obesity in children is directly linked to many serious health problems, such as type 2 diabetes, metabolic syndrome, high blood pressure, asthma and other respiratory problems, sleep disorders, liver disease, heart disease, eating disorders and skin infections.

Physical activity is an important component of chronic disease prevention and weight management. However, less than one out of three children ages six through 17 in Arizona were reported to get at least 20 minutes of vigorous physical activity every day. One in ten did not report getting vigorous activity on any of the last seven days. The establishment of healthy eating patterns early in life also minimizes the risk of developing chronic disease such as cancer, heart disease, obesity, disease and osteoporosis. Every day, more than 13 million preschool age (three to five years) children are in childcare settings. With regards to nutrition in these settings, improvements in increasing the availability of fruits and vegetables, reducing the use of fried foods, sugar-sweetened beverages, and introducing overall nutrition policies will benefit children birth through age five.

Additional considerations for tribal areas

American Indians of all ages and both sexes have disproportionately higher prevalence rate of obesity. The high prevalence of type 2 diabetes mellitus in American Indians shows the adverse

effects that obesity has in these communities. Obesity has become a major health problem among American Indians in the past one to two generations and is believed to be associated with the relative abundance of high-fat foods and the rapid change from active to sedentary lifestyles. The poor success rate of adult obesity treatment programs in the general population points to the need to develop specific prevention approaches aimed toward American Indian children. Because eating and physical activity practices are formed early in life and may be carried into adulthood, prevention programs that encourage increased physical activity and healthful eating habits targeted toward young people need to be developed and tested.

Description of strategy included in the Standards of Practice

ALL PROGRAMS IMPLEMENTING OBESITY PREVENTION STRATEGIES WILL:

- Include strategies to address both improving eating habits and increasing physical inactivity of children 0-5 and their families using the Let's Move principles.
<http://www.letsmove.gov/>
- Align program goals, objectives, and strategies with the goals, objectives, and strategy recommendations identified in the Arizona Nutrition and Physical Activity State Plan. Information on the Arizona Nutrition and Physical Activity State Plan is available on line at: <http://www.eatsmartgetactive.org/pdf/opp6.pdf>
- Understanding the influence that parents and caregivers have on the behaviors of young children, all programs must provide obesity interventions that influence the healthy eating and physical activity behaviors of adults as well as children.
- Collaborate with existing community resources/partners to communicate the healthy weight and physical activity message.

This strategy will move the early childhood system in the San Carlos Apache region by building upon the existing coordination efforts among early childhood professionals and by exploring ways in which funding sources can be maximized in the region. It includes the following:

Parent and family interventions

- Support early literacy efforts into the intervention through the use of literature on nutrition specific to the targeted age group
- Provide education, information and support to parents to promote healthy eating and physical activity among young children and reduce the incidence of overweight and obesity
- Provide education, information and support to parents to limit screen time, and increase physical activity for their children

Child care center/home interventions

- Provide education, information and support to childcare center/home staff to promote healthy eating and physical activity among young children
- Provide education to childcare center/home staff about limiting screen time for children and increasing physical activity as part of the curriculum
- Measure effectiveness of interventions as part of the quality rating assessment system

Community based intervention options

- Expand or create nutrition and physical activity programs in the community targeted to children ages birth through five and pregnant women
- Implement interventions targeting nutrition, healthy weight and physical exercise into existing community services for children birth through five
- Changes in community policy to support:
 - Development of strategies to reduce food deserts in the region
 - Provide health education media messages regarding healthy weight and physical activity in the community.

Applicants should establish networks and partnerships with community organizations, including early care and education and health providers in the region, such as Indian Health Services, community health centers, schools, and early care and education providers, serving children birth through five and build on existing services that are limited to adults by supporting their expansion to include children ages birth through five, as appropriate. Applicants will be asked to demonstrate their experience collaborating with and coordinating efforts among Tribal, federal, state, and other local agencies, community health clinics, local public health programs, local hospitals, social service agencies as well as demonstrate experience working with state, Tribal, and national models surrounding childhood obesity in child care settings. Applicants will be expected to have previous experience working in rural or tribal communities and understand some of the cultural aspects of working with these populations.

Applicants must describe the program curriculum or model to be used and explain how programs provided will be culturally and linguistically appropriate based on the population being targeted. Preference will be given to Applicants who propose strategies and program models/curricula that are evidence-based and provide a description of the research showing positive programmatic outcomes. Staff implementing the curriculum or model program must be adequately trained and qualified as required by the particular program model. Programs must provide outreach to, recruit, and retain, participants in isolated or rural areas of the region.

Target Population to serve

The target population is 113 children birth to five and 113 adults, including parents, guardians, caregivers and child care staff, living within the region.

Geographic Area

The San Carlos Apache Regional Partnership Council serves, and applications submitted in response to this RFGA must serve the communities of the San Carlos Apache Tribe located on the San Carlos Apache Indian Reservation. The San Carlos Apache Regional Partnership Council provides services in the communities of the San Carlos Apache Tribe located on the San Carlos Apache Indian Reservation.

First Things First will fund the successful Applicant(s) to administer the program and the successful Applicant(s) will be responsible to serve the target population in the San Carlos Apache Region. The San Carlos Apache Regional Partnership Council may choose to participate

or change participation in this strategy and the successful Applicant(s) will be required to fulfill implementation needs based on these changes.

Service providers who have not previously provided services within the San Carlos Apache Region may need approval by the San Carlos Apache Tribal Council prior to starting services on the San Carlos Apache Indian Reservation. First Things First regional staff will need to be contacted before **implementation** efforts and may provide assistance in this process.

Coordination and Collaboration

First Things First prioritizes coordination and collaboration among early childhood service providers as critical to developing a seamless service delivery system for children and families. As a result of coordination and collaboration, services are often easier to access and are implemented in a manner that is more responsive to the needs of the children and families. Coordination and collaboration may also result in greater capacity to deliver services because organizations are working together to identify and address gaps in service. Successful Applicants must demonstrate capacity to work with and participate in coordination and collaboration activities occurring within the First Things First region being served. This may include but is not limited to participating in regular meetings. Depending upon the strategy, there may be additional statewide meetings, which the Applicant may be asked to attend, as noted in the Scope of Work. In order to accomplish this, Applicants should plan the appropriate staffing and budget to support travel to and attendance at monthly meetings within the regional area or statewide meetings, as appropriate.

The successful Applicant(s) will need to collaborate with and be a part of the San Carlos Apache Regional Partnership Council Early Childhood Development and Health Collaborative in order to effectively collaborate and coordinate efforts with existing tribal and non-tribal programs providing services within the region.

Program Specific Data Collection and First Things First Evaluation

Successful Applicants agree to participate in the FTF evaluation and any program specific evaluation or research efforts. Data collection and FTF evaluation activities are directly connected with the Goals, Performance Measures and Units of Service aligned to the strategy described in this RFGA.

Unit of Service and related Target Service Number Definition:

A Unit of Service is a FTF designated indicator of performance specific to each FTF strategy. It is composed of a unit of measure and a number (Target Service Number). A Unit of Measure/Service can be a target population and/or a service/product that a grantee is expected to serve as part of an agreement. The Target Service Number represents the number of units (e.g. target population) proposed to be served or number of products/services proposed to be delivered during the contract year.

For example, for the FTF strategy Home Visitation the FTF Unit of Service is “number of families served” and a Target Service Number of 50 represents the number of families the Applicant proposes to serve during the contract period. All FTF applicants must clearly state in the proposal a target service number for each strategy specific Unit of Service.

Performance Measures Definition:

Performance Measures measure (1) key indicators of performance (i.e. Unit of Service); (2) basic implementation of strategy; (3) alignment of program activities to strategy specific standards of practice, (4) performance or progress toward pre-established strategic goals. Performance measures may include the level or type of program activities conducted (e.g. serving families/children through home visits) and/or the direct services and products delivered by a program (e.g., providing scholarships).

Successful Applicants must have capacity to collect and submit FTF data requirements, securely and confidentially store client data, and utilize data to assess progress in achieving desired outcomes of the proposed strategy. Units of Service, Target Service Numbers, and Performance Measures outline how quarterly data submissions will be evaluated according to the contracted deliverables and standards of practice for that contract. Additionally, they are used by FTF to determine the key impacts of the strategies, programs and approaches being implemented.

All successful Applicants will be provided with data reporting requirements by FTF and will meet the requirements of the FTF evaluation including, but not limited to, timely and regular reporting and cooperation with all FTF evaluation activities. Timely and regular reporting of all performance and evaluation data includes the electronic submission of data (as identified in data reporting templates designed for each strategy) through the FTF secure web portal known as PGMS. (The FTF data reporting requirements for this strategy can be found at <http://www.azftf.gov/pages/WebMain.aspx?PageId=9E8669C97C0C408B9F3567C855744398&StrategyId=54>)

Successful Applicants are required to collaborate with the FTF external evaluation, which means the successful Applicant must collaborate with external evaluation-led child assessment activities. Collaborative activities may include tracking and reporting data pertaining to participant attendance, enrollment, and demographic information. In addition, Applicants agree to allow FTF and evaluation consultants of FTF to observe program activities on site and successful applicants must collaborate with FTF led and initiated evaluation activities to encourage parent consent for data collection. (Standards for data security and informed consent for this strategy can be found in Exhibit C.)

Units of Service and Performance Measures that are aligned to the Goal for the purposes of this RFGA are as follows:

Unit of Service:

For **Nutrition/Obesity/Physical Activity**, the Units of Service are:

Number of participating adults
Number of participating children

Performance Measures:

For **Nutrition/Obesity/Physical Activity**, performance measures are:

Number of participating adults/ proposed service number

Number of participating children / proposed service number

Narrative reports should include the following if applicable:

- Description of level of intervention and targeted outreach and attendance for each level of intervention: parent/child; childcare staff, community level interventions.
- Report on challenges and successes for each strategy as well as how implementation strategies have changed as a result of the progress being made.
- Description of community collaborations that have occurred as a result of this work.

Lack of care in preparing an Application shall not be grounds for modifying or withdrawing the Application after the Application due date and time, nor shall it give rise to any Contract claim.
2. RFGA Contact Person. Any inquiry related to an RFGA, including any requests for or inquiries regarding standards referenced in the RFGA shall be directed solely to the RFGA contact person. The Applicant shall not contact or direct inquiries concerning this RFGA to any other State employee unless the RFGA specifically identifies a person other than the RFGA contact person as a contact.

The Fiscal and Contracts Specialist identified in this RFGA, who is the contact for all inquiries except at the Pre-Application Conference, requires that an inquiry be submitted in writing. Any inquiry related to the RFGA shall refer to the appropriate RFGA number, page and paragraph. Do not place the RFGA number on the outside of the envelope containing that inquiry, since it may then be identified as an Application and not be opened until after the Application due date and time. Electronic inquiries are acceptable. First Things First shall consider the relevancy of the inquiry but is not required to respond in writing.
4. Timeliness. Any inquiry or exception to the RFGA shall be submitted as soon as possible and should be submitted at least seven days before the Application due date and time for review and determination by First Things First. Failure to do so may result in the inquiry not being considered for an RFGA Amendment.

Any doubt as to the requirements of the RFGA or any apparent omission or discrepancy should be presented to First Things First at the Conference. An Applicant may not rely on any verbal responses to questions at the Conference. Material issues raised at the Conference that result in changes to the RFGA shall be answered solely through a formal written RFGA amendment. **Attendance at the Pre-Application Conference is strongly encouraged, but not mandatory.**
8. Persons with Disabilities. Persons with a disability may request a reasonable accommodation, such as a sign language interpreter, by contacting the RFGA contact person. Requests shall be made as early as possible to allow time to arrange the accommodation.

exceptions not included in such a section shall be without force and effect in any resulting Contract unless such exception is specifically accepted by the Fiscal and Contracts Specialist in a written statement. The Applicant's preprinted or standard terms will not be considered by First Things First as a part of any resulting Contract. All exceptions that are contained in the Application may negatively affect First Things First's proposal evaluation based on the evaluation criteria stated in the RFGA or result in rejection of the Application.

7. State's Contractual Remedies

- 7.1 Right to Assurance. If First Things First in good faith has reason to believe that the Grantee does not intend to, or is unable to perform or continue performing under this Contract, the Fiscal and Contracts Specialist may demand in writing that the Grantee give a written assurance of intent to perform. Failure by the Grantee to provide written assurance within the number of Days specified in the demand may be, at First Things First's discretion, the basis for terminating the Contract under the First Things First Uniform Terms and Conditions or other rights and remedies available by law or provided by the contract.
- 7.2 Cancellation for Failure to Perform. Failure by the Grantee to adhere to any provision of this Agreement or its Attachments in the time and manner provided by this Contract or its Attachments shall constitute a material default and breach of this Contract and First Things First may cancel, at its option, this Agreement upon prior written notice.

- 7.3 Non-Exclusive Remedies The rights and the remedies of First Things First under this Contract are not exclusive.

8. **Contract Termination**

In the event of termination under this paragraph, all documents, data and reports prepared by the Grantee under the Contract shall become the property of and be delivered to First Things First upon demand. The cost principles and procedures provided in A.A.C. R2-7-701 shall apply.
- 8.4 Termination for Default. In addition to the rights reserved in the contract, First Things First may terminate the Contract in whole or in part due to the failure of the Grantee to comply with any term or condition of the Contract, to acquire and maintain all required insurance policies, bonds, licenses and permits, or to make satisfactory progress in performing the

Contract. First Things First shall provide written notice of the termination to the Grantee. Upon termination under this paragraph, all materials, documents, data and reports prepared by the Grantee under the Contract shall become the property of and be delivered to First Things First on demand. Attachment E and F Instructions

How to Complete the Line Item Budget and Budget Narrative

Complete a 9-month budget for the period October 1, 2012 through June 30, 2013 using the template provided in Attachment E. Please make sure you include a budget narrative as Attachment F.

Please keep in mind items described in a line item budget and in more detail in the budget narrative should describe how the costs were determined and the public purpose for the cost related successfully implementing the project. Please assure that all requested funds follow these guidelines:

- Be necessary and reasonable for proper and efficient performance and administration of First Things First funds.
- Be authorized or not prohibited under State or local laws or regulations.
- Be consistent with policies, regulations, and procedures that apply uniformly to all costs charged and expended by the agency – consistent treatment of costs.
 - For example – a cost may not be assigned to another grant award as an indirect cost if any other cost incurred for the same purposes in like circumstances has been allocated to the First Things First award as a direct cost.
 - For example – a cost for a certain type of expense is charged one rate to another source of funding and a different rate to First Things First - this would not be consistent treatment of costs.
- Be determined in accordance with generally accepted accounting principles.
- Be adequately documented.
- All travel related costs for these trainings and meetings should be included in the Applicant's budget and calculated using the State of Arizona travel rate limitations for mileage, per diem and lodging as described on the budget narrative worksheet. For more information about the state requirements, visit <http://www.gao.az.gov/travel/>.
- Requests for line item modifications, which do not change the total program funding, shall be requested in writing and shall only be made following receipt of written authorization from First Things First.

Please note the line items included in the budget template represent the types of costs possible for a line item budget these line items may or may not be applicable or appropriate for your Application. Your budget line items requested must fit within one of the categories listed. However, it is expected that you would not need to utilize all of the sample line items.

Attachment E – Line Item Budget

While you must use this format, you may reproduce it with Word Processing or Spreadsheet software. Limit your budget line items to the following categories: Personnel, Fringe Benefits, Professional Services, Travel, Pass-Through (i.e. Sub grants), Other Operating Expenses and Administrative/Indirect Costs.

Attachment F – Budget Narrative

The purpose of the budget narrative is to provide more clarity and detail on the various budget line items. The budget narrative should explain the criteria used to compute the budget figures on the budget form. Please verify that the narrative and budget form correspond and the calculations and totals are accurate.

Please include one narrative that matches the 9-month line item budget categories and subcategories.

Personnel Services: *Include information such as position title(s), name of employee (if known), salary, time to be spent on this program (hours or %), number of months assigned to this program, etc. Explain how the salary rate for each position was determined. If salaries are expected to increase during the project year, indicate the percentage increases for each position and justify the percent of the salary increase. Also, be sure to include the scheduled salary increases on the Budget Form.*

Employee Related Expenses: *Include a benefit percentage and what expenses make up employee benefit costs. Indicate any special rates for part-time employees, if applicable. Explain how the benefits for each position were determined. If using a fringe benefit rate, explain how this percentage is justified or approved by your agency.*

Professional and Outside Services: *If professional consultants/services costs are proposed in the budget, define how the costs for these services were determined and the justification for the services related to the project. Explain how all contracts will be procured.*

Travel: *Separate travel that is in state and out-of-state. Include a detailed breakdown of hotel, transportation, meal costs, etc. Indicate the location(s) of travel, the justification for travel, how many employees will attend and how the estimates have been determined. Explain the relationship of each cost item to the project (e.g., if training or training expenses are requested, explain the topic of the training and its relationship to the project). Applicants **must** use the State of Arizona Travel Policy on rates limitations for mileage, lodging, and meals (<http://www.gao.az.gov/travel/>) for both in-state and out-of-state travel.*

Aid to Organizations or Individuals: *In the event that this application represents collaboration and the contract will be utilizing other sub grantees or subcontractors to perform various components of the program, include a list of sub grantees, programmatic work each sub grantee will perform, and how costs for each sub grantee are determined.*

Other Operating Expenses: *Explain each item to be purchased, how the costs were determined and justify the need for the items. All purchases should be made through competitive bid or using established purchasing procedures. All items should be categorized in the following categories: Telephones / Communications Services, Internet Access, General Office Supplies, Food, Rent/Occupancy, Evaluation (non-contracted and non-personnel expenses), Utilities, Furniture, Postage, Software (including IT supplies), Dues/Subscriptions, Advertising, Printing/Copying, Equipment Maintenance, Professional Development/Staff Training, Conference Workshops/ Training Fees for Staff, Insurance, Program Materials, Program Supplies, Scholarships, and Program Incentives*

Non-Capital Equipment: *For items with a unit cost less than \$5,000 and an initial estimated useful life beyond a single year, explain each item to be purchased, how the costs were determined and justify the need for the items. All purchases should be made through competitive bid or using established purchasing procedures. For example, items such as computers, printers, projectors, etc. each with a unit cost less than \$5,000.*

Administrative/Indirect Costs: *Administrative costs are general or centralized expenses of overall*

administration of an organization that receives grant funds and does not include particular program costs. For organizations that have an established federally approved indirect cost rate for Federal awards, indirect costs mean those costs that are included in the organization's indirect cost rate. Such costs are generally identified with the organization's overall operation and are further described in 2 CFR 220, 2 CFR 225, and 2 CFR 230.

Applicants must list either Option A or Option B and provide proper justification for expenses included:

- ☐ **Option A - Administrative Costs:** with proper justification, sub grantees may include an allocation for administrative costs for up to 10% of the total direct costs requested of the grant request. Administrative costs may include allocable direct charges for: costs of financial, accounting, auditing, contracting or general legal services; costs of internal evaluation, including overall organization's management improvement costs; and costs of general liability insurance that protects the organization(s) responsible for operating a project, other than insurance costs solely attributable to the project. Administrative costs may also include that portion of salaries and benefits of the project's director and other administrative staff not attributable to the time spent in support of a specific project.

OR

- ☐ **Option B - Federally Approved Indirect Costs:** If your organization has a federally approved indirect cost rate agreement in place, grantees may include an allocation for indirect costs for up to 10% of the direct costs. **Applicants must provide a copy of their federally approved indirect cost rate agreement.**

Indirect costs are costs of an organization that are not readily assignable to a particular project, but are necessary to the operation of the organization and the performance of the project. The cost of operating and maintaining facilities, depreciation, and administrative salaries are examples of the types of costs that are usually treated as indirect.

Nutrition/Obesity/Physical Activity

I. Description of Health Strategy Issue

A great deal of public health research indicates that Arizona's children are not as healthy as they could be to prevent lifestyle related risk factors later in life. Increased rates of obesity, diabetes paired with poor nutrition, a sedentary lifestyle, and a variety of economic and social factors are all contributing to a population of children with increased rates of obesity. Even more alarming is recent news is that life expectancy for children born today may actually be less than that of their parents and that they develop diseases that are more chronic at an earlier age.

The goal of this strategy is to provide community and place-based health education focused on obesity prevention to children, families and early childcare and education professionals to ensure that children have a healthy life and that parents and caregivers, schools, communities support good nutrition habits. Children may be particularly vulnerable to harm because of their limited ability to make choices, dependence on adults for food and other goods, and susceptibility to marketing. This strategy also includes policy support.

II. Implementation Standards

A. All programs implementing obesity prevention strategies will:

- Include strategies to address both improving eating habits and increasing physical inactivity of children and their families.
- Align program goals, objectives, and strategies with the goals, objectives, and strategy recommendations identified in the Arizona Nutrition and Physical Activity State Plan. Information on the Arizona Nutrition and Physical Activity State Plan is available on line at: <http://www.eatsmartgetactive.org/pdf/opp6.pdf>
- Acknowledge the influence that parents and caregivers have on the behaviors of young children and provide obesity interventions that influence the healthy eating and physical activity behaviors of adults as well as children.
- Collaborate with existing community resources/partners to communicate the healthy

weight and physical activity message. For example, encourage childcare centers and home care providers to participate in the Arizona Department of Health Services' "Empowerment Pack" program. Information on the Arizona Department of Health Services' Empowerment Pack is available on line at <http://www.theempowerpack.org/>

- Programs targeting childcare centers and home care providers will actively promote participation in the USDA Child and Adult Care Food Program to potentially eligible centers/providers. Information on the USDA Child and Adult Care Food Program is available online at <http://www.fns.usda.gov/cnd/care/>
- Recognizing that certain populations are at greater risk, resulting in disparities in the prevalence of obesity, interventions/curriculum/programs need to be tailored appropriately for various populations and incorporate cultural, linguistic, geographic and socioeconomic factors.

Evidence based or best practice programs for childcare environments to improve nutrition and physical activity include:

- *Nutrition and Physical Activity in Child Care (NAP SACC)*
 - Strategy includes child care center self-assessment on nutrition and physical activity practices, goal setting, technical assistance provided by trained child care health consultant, evaluation, revision, repetition. Information provided to parents.
<http://www.center-trt.org/index.cfm?fa=opinterventions.intervention&intervention=napsacc&page=intent>
- *I am moving, I am learning (IM/IL) Head Start Obesity Prevention Program*
 - Program allows staff to integrate obesity prevention practices into daily practices. A key feature of IM/IL is that it flexible, allows programs to tailor and individualize strategies and activities to meet local program needs. Requires Head Start teachers to attend a 2 ½-day training, where they participate in interactive workshops and develop strategies for program implementation.
 - <http://eclkc.ohs.acf.hhs.gov/hslc/tta-system/health/Health/Nutrition/Nutrition%20Program%20Staff/IMIL/IamMovingIamLearning.htm>
- *Hip-Hop to Health Jr.*
 - Targets three- to five-year-old minority children enrolled in Head Start programs with the aim of reducing the tendency toward overweight and obesity in African American and Latino preschool children. The intervention presents a developmentally, culturally, and linguistically appropriate dietary and physical activity curriculum for preschoolers, and a parent component.
<http://www.childtrends.org/Lifecourse/programs/hiphop.htm>
- *Healthy Start*
 - Modification of childcare food service menus and recipes. Outcome: decrease in fat and calories of meals resulting in a reduction in total serum cholesterol.
- *Color Me Healthy/Color Me Healthy*
 - Preschool/childcare center curriculum that promotes eating fruits and vegetables and being active. Recipes, activities, coloring books, songs and lyrics

Community interventions to consider and include:

- Assess their retail food environment to better understand the current landscape and differences in accessibility to healthier foods.
See [Healthier Food Retail: Beginning the Assessment Process in Your State or Community](#) (PDF-522k).
- Provide incentives to existing supermarkets and farmers' markets to establish their businesses in low-income areas or to sell healthier foods.
See [Improving Access to Healthy Food – PolicyLink](#) and [The Food Trust](#).
- Expand programs that bring local fruits and vegetables to schools.
See [National Farm to School Network](#).
- Adopt standards for childcare licensing that reduce the availability of less healthy foods and sugar drinks, and limit screen time.
See [Preventing Childhood Obesity in Early Care and Education Programs](#) (PDF-6.4Mb).
- Increase access to free drinking water and limit the sale of sugar drinks in schools by establishing school wellness and nutrition policies.
See [Nutrition Standards for Foods in Schools](#) and [Water in Schools](#).
- Support breastfeeding in hospitals and the workplace.
See [Breastfeeding Promotion & Support](#) to find out how [Health Care](#) and [Employment](#) can support breastfeeding.
- Create and maintain safe neighborhoods for physical activity and improve access to parks and playgrounds.
See [National Center for Safe Routes to School](#) and [National Recreation and Parks Association](#).
- Support quality daily physical education in schools and daily physical activity in childcare facilities.
See [Working with Schools to Increase Physical Activity Among Children and Adolescents in Physical Education Classes](#) and [SPARK \(Sports, Play and Active Recreation for Kids\)](#).

Results of childcare center interventions may result in:

- Increased childcare center staff knowledge of providing more fruits and vegetables to children as well as reducing the use of fried foods and sugar-sweet beverages as part of center diets.
- Changed practices within childcare centers related to health food choices.
- Changed practices in childcare centers related to physical activity time for children.
- A reduction of aggregate Body Mass Index (BMI) of children who receive program services (if approved by IRB and parent's/guardian's signed consent forms).
- Increased parental knowledge related to healthy food choices for their children, change in parental behaviors.

Results of Community-based interventions may result in:

- Increase community coalitions to promote healthier food resources, i.e. small grocery stores, large chain stores, etc.
- Increase community coalitions to promote healthier environments that promote physical activity-i.e. playgrounds, walking trails, community activities.
- Increased community resources for healthy food choices.
- Implementation of community interventions such as childcare center gardens, farmers markets, changes in within the community.

III. Cultural Competencies

Programs will also implement the following best practices and standards related to Cultural Competencies:

- To address cultural competency objectives, early childhood practitioners /early childhood service providers shall ensure that children and families receive from all staff members and program participants' effective, understandable, and respectful care that is provided in a culturally competent manner. Early childhood practitioners /early childhood service providers should ensure that staff and participants at all levels and across all disciplines receive ongoing education and training in culturally and linguistically appropriate service delivery. Early childhood practitioners/early childhood service providers should develop participatory, collaborative partnerships with communities and utilize a variety of formal and informal mechanisms to facilitate community and family-centered involvement to ensure that services are delivered in a manner that is consistent with the National Standards on Culturally and Linguistically Appropriate Services and/or the National Recommendations on Cultural and Linguistic Competence for the National Association for the Education of Young Children."
<http://minorityhealth.hhs.gov/templates/browse.aspx?lvl=2&lvlID=15>
<http://www.naeyc.org/positionstatements/linguistic>
- Service providers should understand individual Tribes/Nations are distinct and separate communities from other Tribes/Nations and their governmental systems and structures are not reflective of each other. Services to Tribal communities and on reservations must be provided in a manner compatible with the Tribe's/Nation's cultural beliefs and practices, to include the preferred language of the community. Services must also be provided in accordance with the Tribe's/Nation's laws, policies and procedures. The effectiveness of services is directly related to the provider's consideration of the beliefs, customs and laws of the Tribe/Nation.
- Service providers can obtain information about providing services on tribal lands from a variety of sources. These include the FTF Regional Director, Regional Council members, tribal websites and publications, as well as official representatives of the Tribe/Nation such as the governing body, standing committees and authorized departments.
- It is highly recommended that service providers seek guidance from one or more of these sources before initiating services on reservations. Failure to do so could result in contraventions of cultural beliefs, Tribal laws or sovereignty.
- The ideal applicant will demonstrate their ability to operate within these parameters through prior experience working with Tribes/Nations, demonstrating that staff are

culturally competent, partnerships with agencies serving Native American families, knowledge of cultural beliefs, customs and laws of the Tribe/Nation or a combination of these elements.

- Related to data collection, evaluation or research activities:
 - In the United States, Native American Tribes are considered autonomous nations with all of the rights and responsibilities of a nation. Understanding this, Native American Tribes are charged with protecting the health and safety of their people. To this end, Tribes have full ownership over any data collected within their reservation boundaries. This means that Tribes can allow or not allow any program to collect data from or related to any early childhood development and health program or activities on the reservation.
 - Any grantee implementing programs in tribal communities must have official tribal permission to collect and utilize sensitive data from or related to any early childhood development and health program or activities. Such data can include but not be limited to:
 - Morbidity and mortality among children members of their communities
 - Information regarding child safety and welfare
 - Information regarding children in foster care
 - Infectious and chronic disease information among members of their communities
 - BMI and healthy weight information beginning at age 2 years and each year after that

Nutrition/Obesity/Physical Activity

Unit of Service and related Target Service Number

A Unit of Service is a FTF designated indicator of performance specific to each FTF strategy. It is composed of a unit of measure and a number (Target Service Number).

A Unit of Measure/Service can be a target population and/or a service/product that a grantee is expected to serve as part of an agreement. Target Service Number represents the number of units (e.g. target population) proposed to be served or number of products/services proposed to be delivered during the contract year.

For example, for the FTF strategy Home Visitation the FTF Unit of Service is “number of families served” and a Target Service Number of 50 represents the number of families the program proposes to serve during the contract period. All FTF applicants must clearly state in the proposal a target service number for each strategy specific Unit of Service.

For **Nutrition/Obesity/Physical Activity**, the Units of Service are:

Number of participating adults
Number of participating children

Determining and Interpreting Target Service Numbers

Number of participating adults should reflect the total number of adult participants proposed to be trained during the grant contract period (in most cases, one year). This should be a total count (aggregate) of all adults who are proposed to participate in all training sessions. Please note this may be a **duplicated** count since it is possible for the same participant to attend multiple trainings during the same grant contract period. For example, if the program proposes to train 20 participants in a series of five sessions, the total target service number should be 100 participants, rather than 20 (as FTF does not collect series specific information). If the program does not provide a series of sessions (for instance a program may provide walk-in training sessions), the total target service number should reflect all participants proposed to attend all trainings targeted for the contract period. This may be a **duplicated** count since one participant may attend multiple walk-in training sessions.

Number of participating children served should reflect the total number of children proposed to receive training during the grant contract period (in most cases, one year). Please note this may be a **duplicated** count since it is possible for the same child to attend multiple trainings during the same grant contract period.

Performance Measures

Performance Measures measure (1) key indicators of performance (i.e. Unit of Service); (2) basic implementation of strategy; (3) alignment of program activities to strategy specific standards of practice, (4) performance or progress toward pre-established strategic goals. Performance measures may include the level or type of program activities conducted (e.g. serving families/children through home visits) and/or the direct services and products delivered by a program (e.g. providing scholarships).

For **Nutrition/Obesity/Physical Activity**, the performance measures are:

Number of participating adults/ proposed service number

Number of participating children / proposed service number

Number of training sessions conducted

First Things First - Arizona Early Childhood Development and Health Board Data Security Guidelines and Requirements for Collaborators

BACKGROUND:

The purpose of First Things First is to aid in the creation of a system that offers opportunities and supports for families and communities in the development of all children so they can grow up healthy and ready to succeed. Our work is accountable and transparent to decision-makers and the citizens of Arizona. Collaboration and direct funding of grantees to undertake work on behalf of the children and families of Arizona is fundamental to the purpose and mission of FTF. Regular submission of data related to funded work is an important part of ensuring accountability and maximum positive impact for young children.

Data Security Guidelines for Data Submission to FTF

The Arizona Early Childhood Development and Health Board (First Thing First - FTF) will ensure that resources allocated have maximum impact for the benefit of children and families. To ensure this accountability, FTF will establish data reporting requirements for all state and regional grantees. All funded providers will regularly submit programmatic and financial reports as identified in the FTF reporting requirements.

FTF data submissions are classified in one of three levels:

- **Public data**
- **Limited distribution data**
- **Confidential data**

The majority of FTF reporting submissions are completed through the FTF Partner and Grants Management System (PGMS). Subsequent to the award of a FTF contract, the grantee will receive general training on login and navigation within the PGMS system. With this login the grantee will be able to manage their contract information. An additional training on strategy-specific data submission requirements will also be conducted. During that training the grantee will be informed on submission of data reporting requirements through PGMS. All data submitted through PGMS is **public data** or **limited distribution data**. Because PGMS is located in a secure extranet environment, grantees using PGMS for data submission are not required to undertake additional security measures related to their data submission above those identified in the general and data submission orientations (password and login security, guidelines for upload of narrative and other reports).

A small group of grantees submit data requirements, through agreement between the grantee and FTF, directly through the FTF extranet, rather than a PGMS web-based entry form. These data are likely to contain limited distribution data and must follow the following protocols. Data structure agreement, Login, ftp, revision request. Grantees that submit data through the FTF extranet must ensure that limited distribution data may not be intercepted or viewed at any time by parties other than the grantee and FTF and that throughout the reporting and submission process the data are secured.

Any grantee submitting data identified as confidential must file a formal data security policy with FTF. Confidential data will not be a part of standard data submission requirements. Grantee general orientation

and data reporting orientation will identify data requirements as public data, limited distribution data, and/or confidential data.

Data Security Guidelines for Grantee Maintenance of Data

In order to submit data to FTF in fulfillment of reporting requirements, grantees must keep all data collected for their program(s) within their system (database) or hardcopies. While FTF data submissions are generally aggregated and contain no individually identifying information, grantee data is likely to contain highly sensitive information on individuals, their education and their health. These guidelines and requirements are for the maintenance of those data.

All grantees must have a data security policy in force that identifies how the organization ensures that data is protected in all its forms, during all phases of its life cycle, from inappropriate access, use, modification, disclosure, or destruction.

All grantees subject to HIPAA, FERPA, GITA, or other data regulation, are required to submit and maintain those approvals for all data. If HIPAA, FERPA or other data regulation requires that participating individuals give consent to data collection on their person and if in the course of regular data submissions to FTF such data will be provided to FTF, submission of personal data to FTF must be reflected in all data regulation documents.
